IN BUILDING
WIRELESS

WIRELESS
LAN

A MARKET IN TRANSITION

Wi-Fi was
built for this...

...NOT for mission
critical use cases...

...Enter private
5G LANs

5G LAN

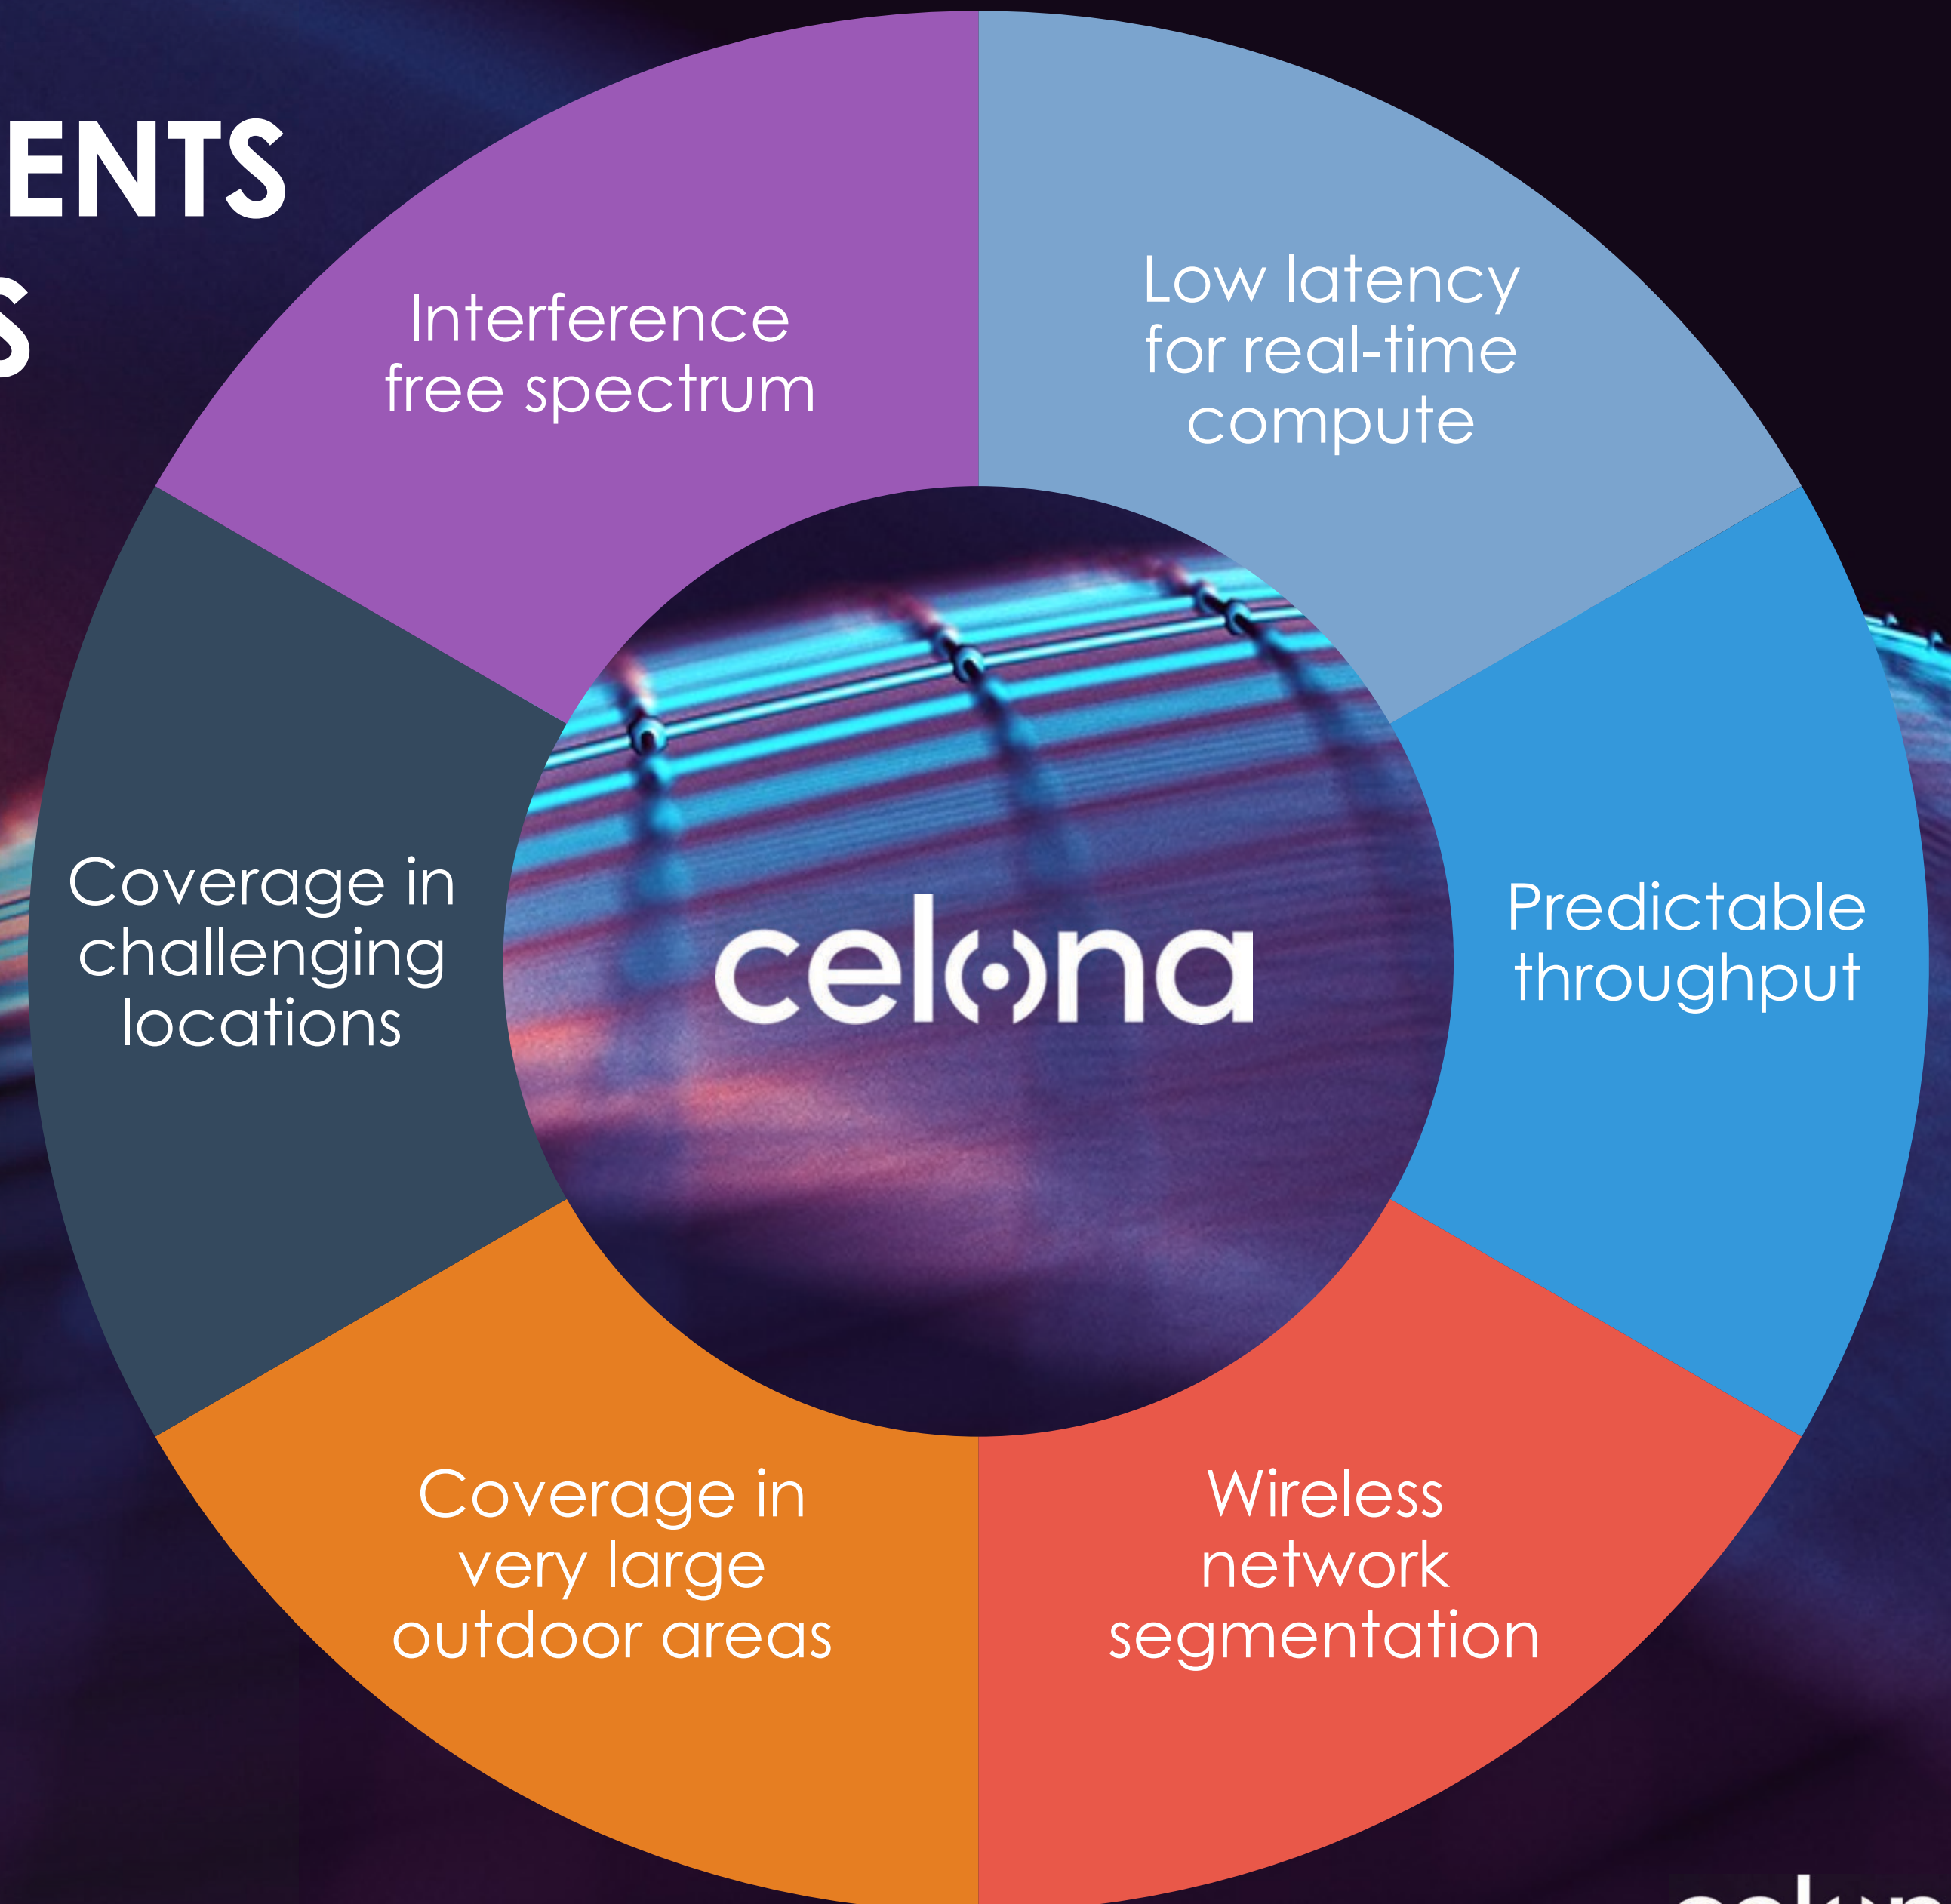

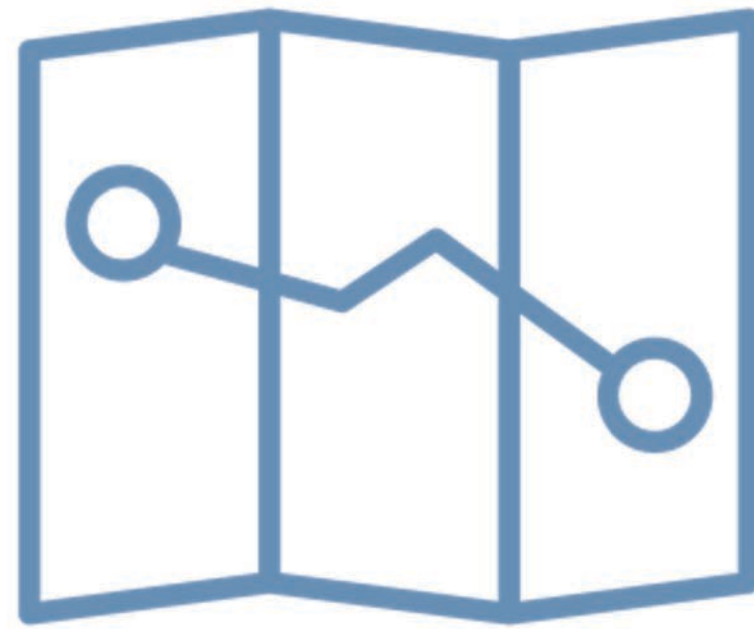

NEW GENERATION OF DIGITAL INITIATIVES COME WITH SIGNIFICANT OPPORTUNITIES

DRIVING NEW REQUIREMENTS FOR ENTERPRISE WIRELESS

What is private LTE/5G and what are the benefits

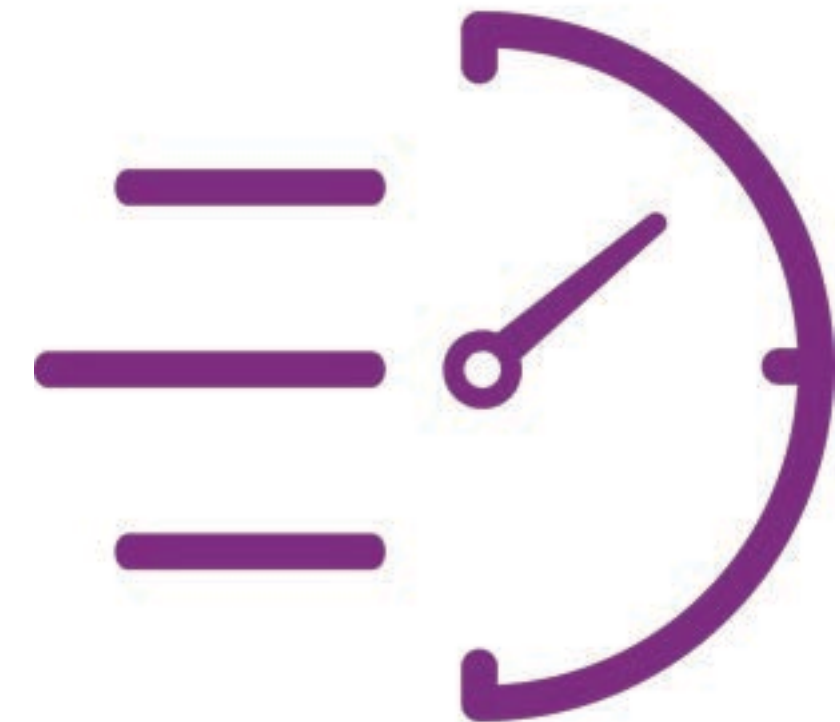

Range

4x greater range than typical WiFi deployments

Reliability

Dedicated Spectrum and Infrastructure Controlled Transmission and Mobility Handover

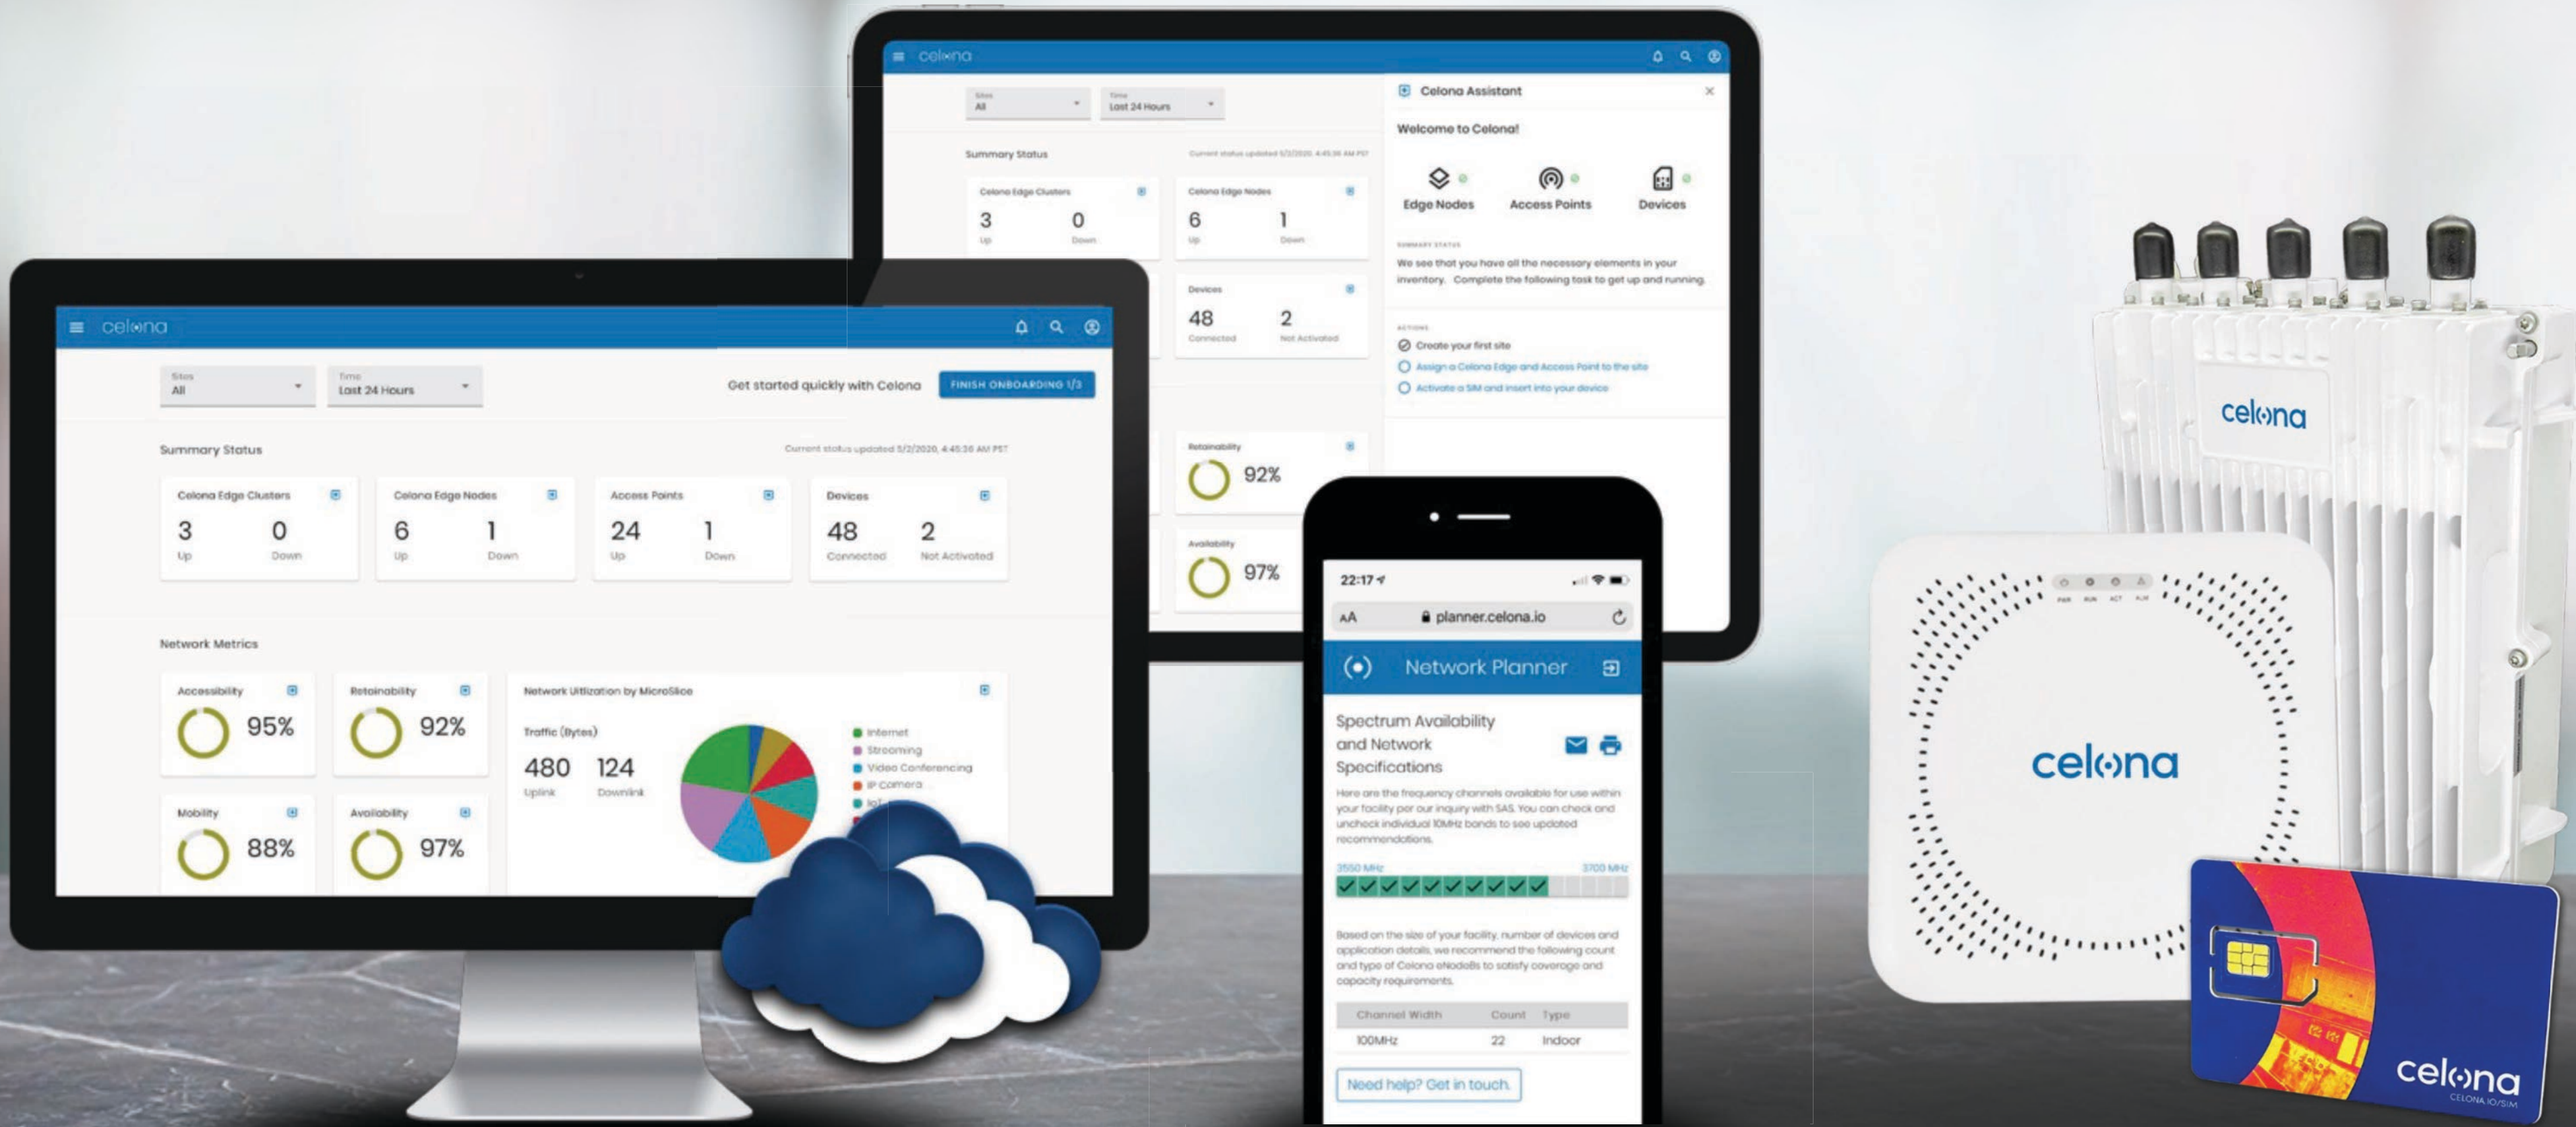

Performance

Configurable SLAs that are strictly enforced per device, application, or location

WHAT IF ANY ENTERPRISE CAN BUILD THEIR OWN?

NOW THEY CAN...

celona

SUPER EASY TO UNDERSTAND, DEPLOY & USE AT SCALE

5G LAN OS

Celona Orchestrator
5G LAN operations

ON-PREM

CLOUD

End to End:
Every component you need

Designed for the Enterprise:
with Wi-Fi like simplicity

Cloud managed:
deploy in hrs/days vs. weeks/mths

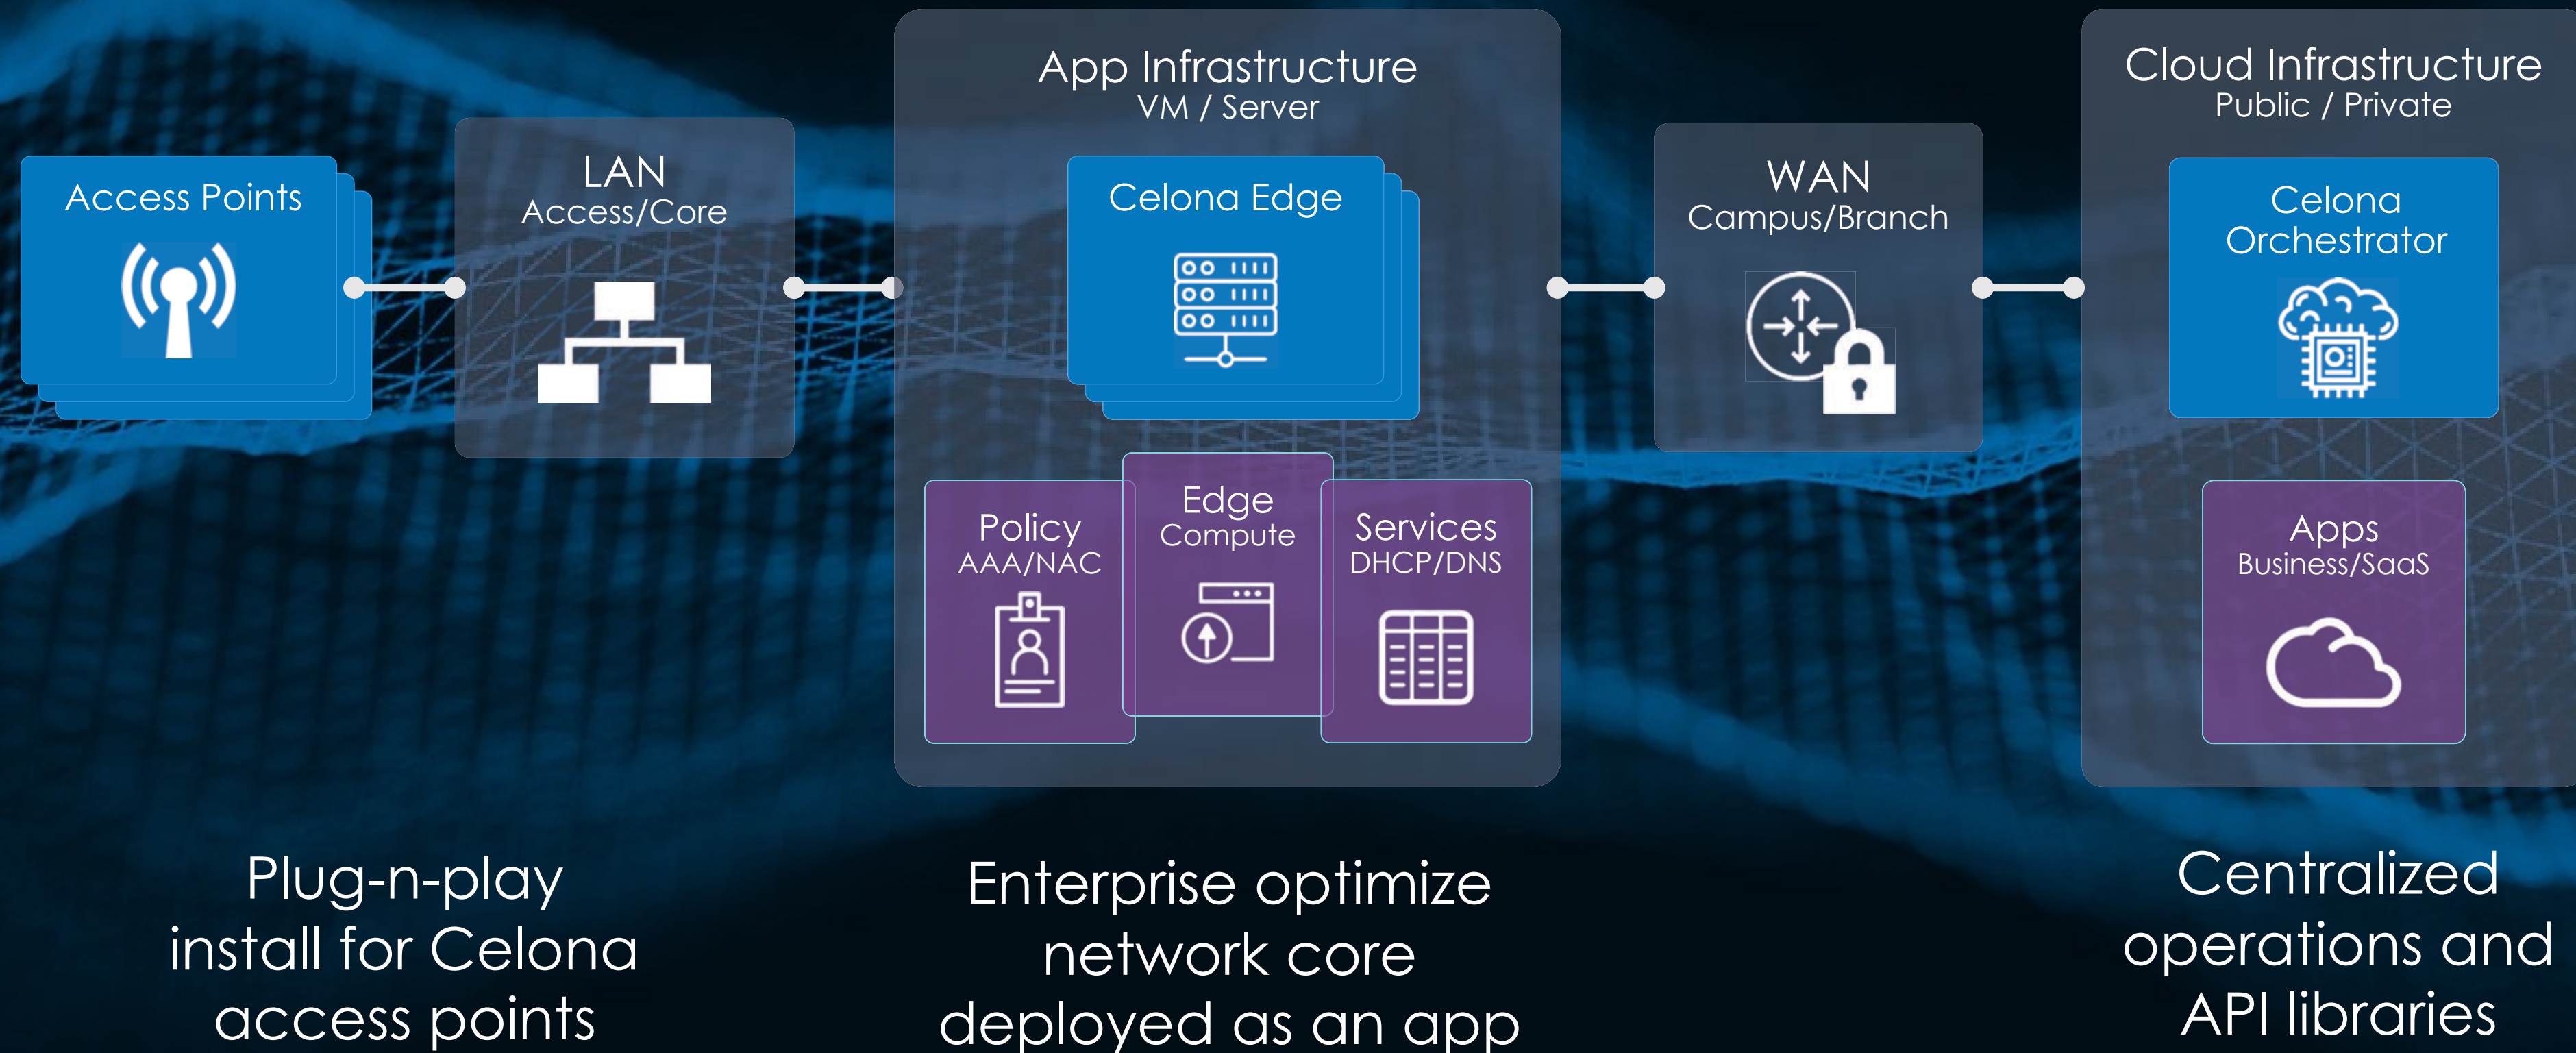

celona

CONSUMPTION MODEL ALIGNED WITH MODERN IT OPERATIONS

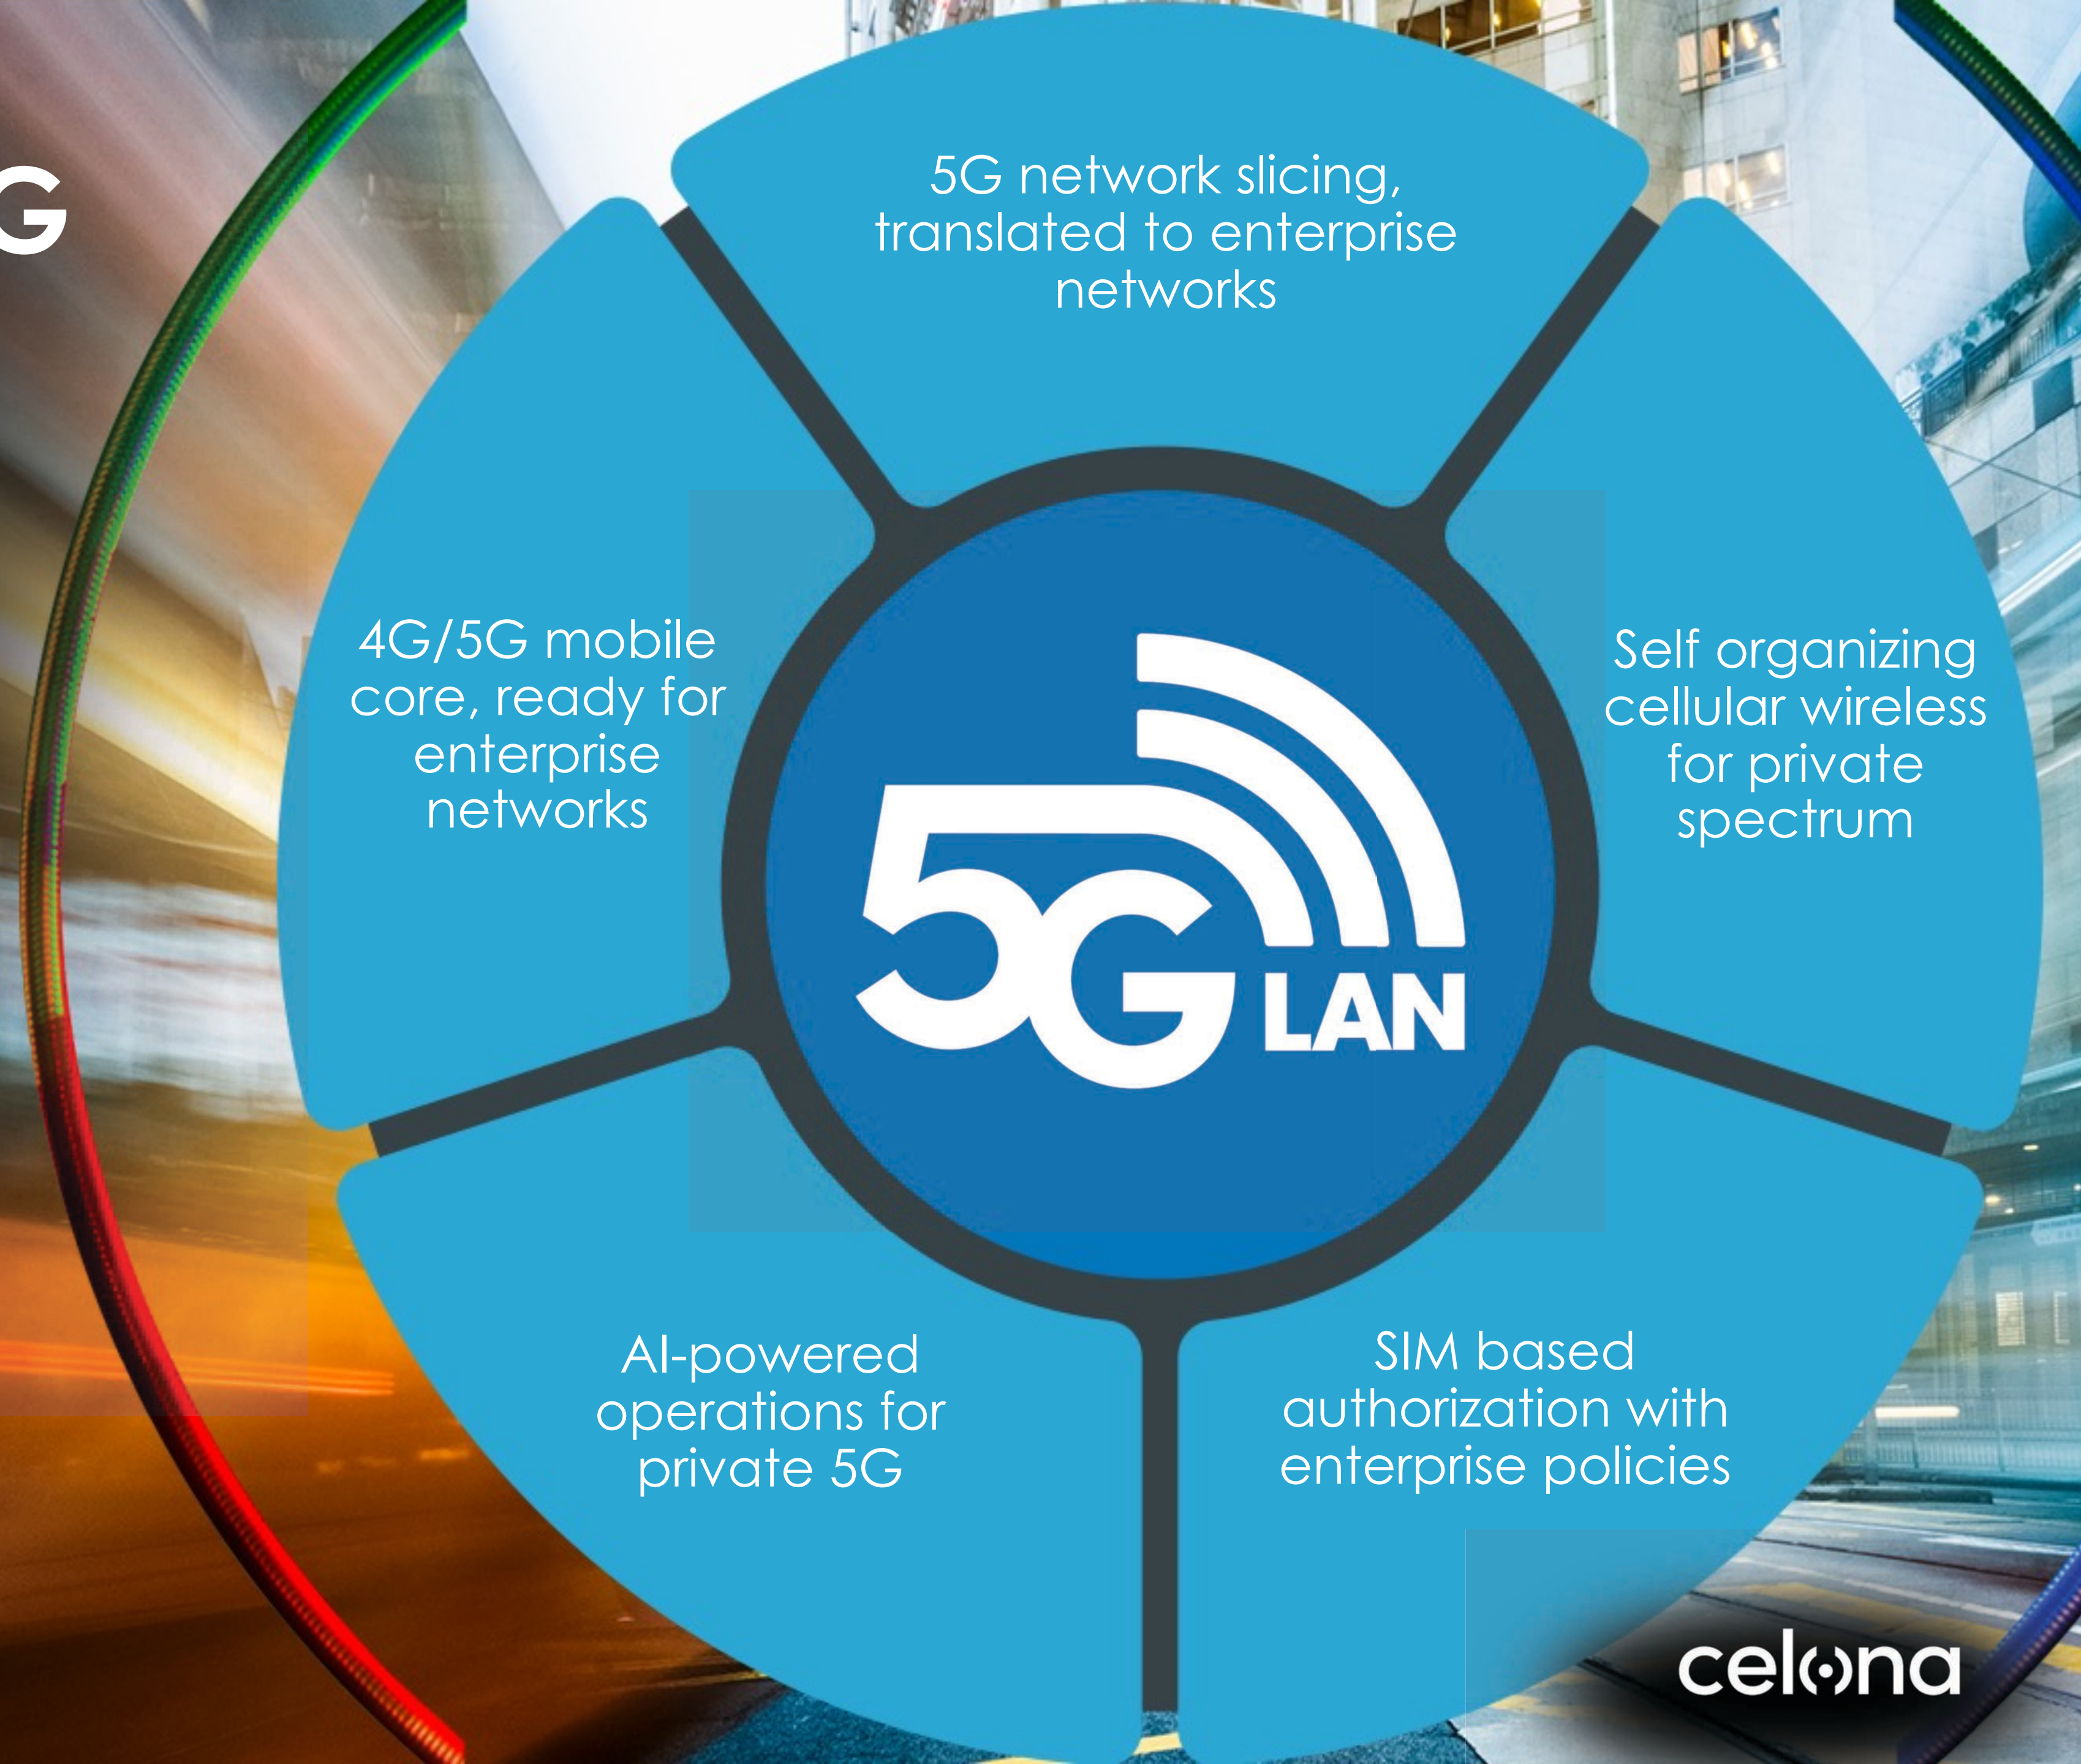

- All ingredients in a single SaaS subscription
- Delivered via trusted IT VAR channels
- Strategic alliances with industry leaders
- Open device, app and compute ecosystem
- Easily adopted by managed service providers

SEAMLESS ENTERPRISE INTEGRATION

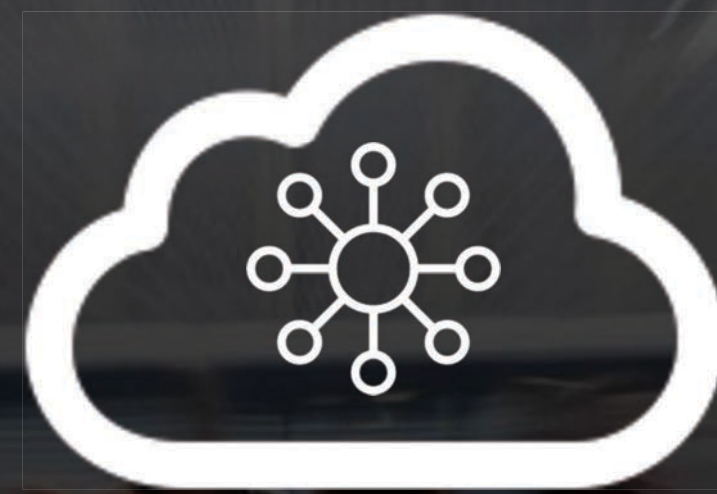

MARKET LEADING INNOVATION

DIFFERENTIATED AND PATENTED TECHNOLOGY

Only comprehensive
end-to-end system for
enterprises

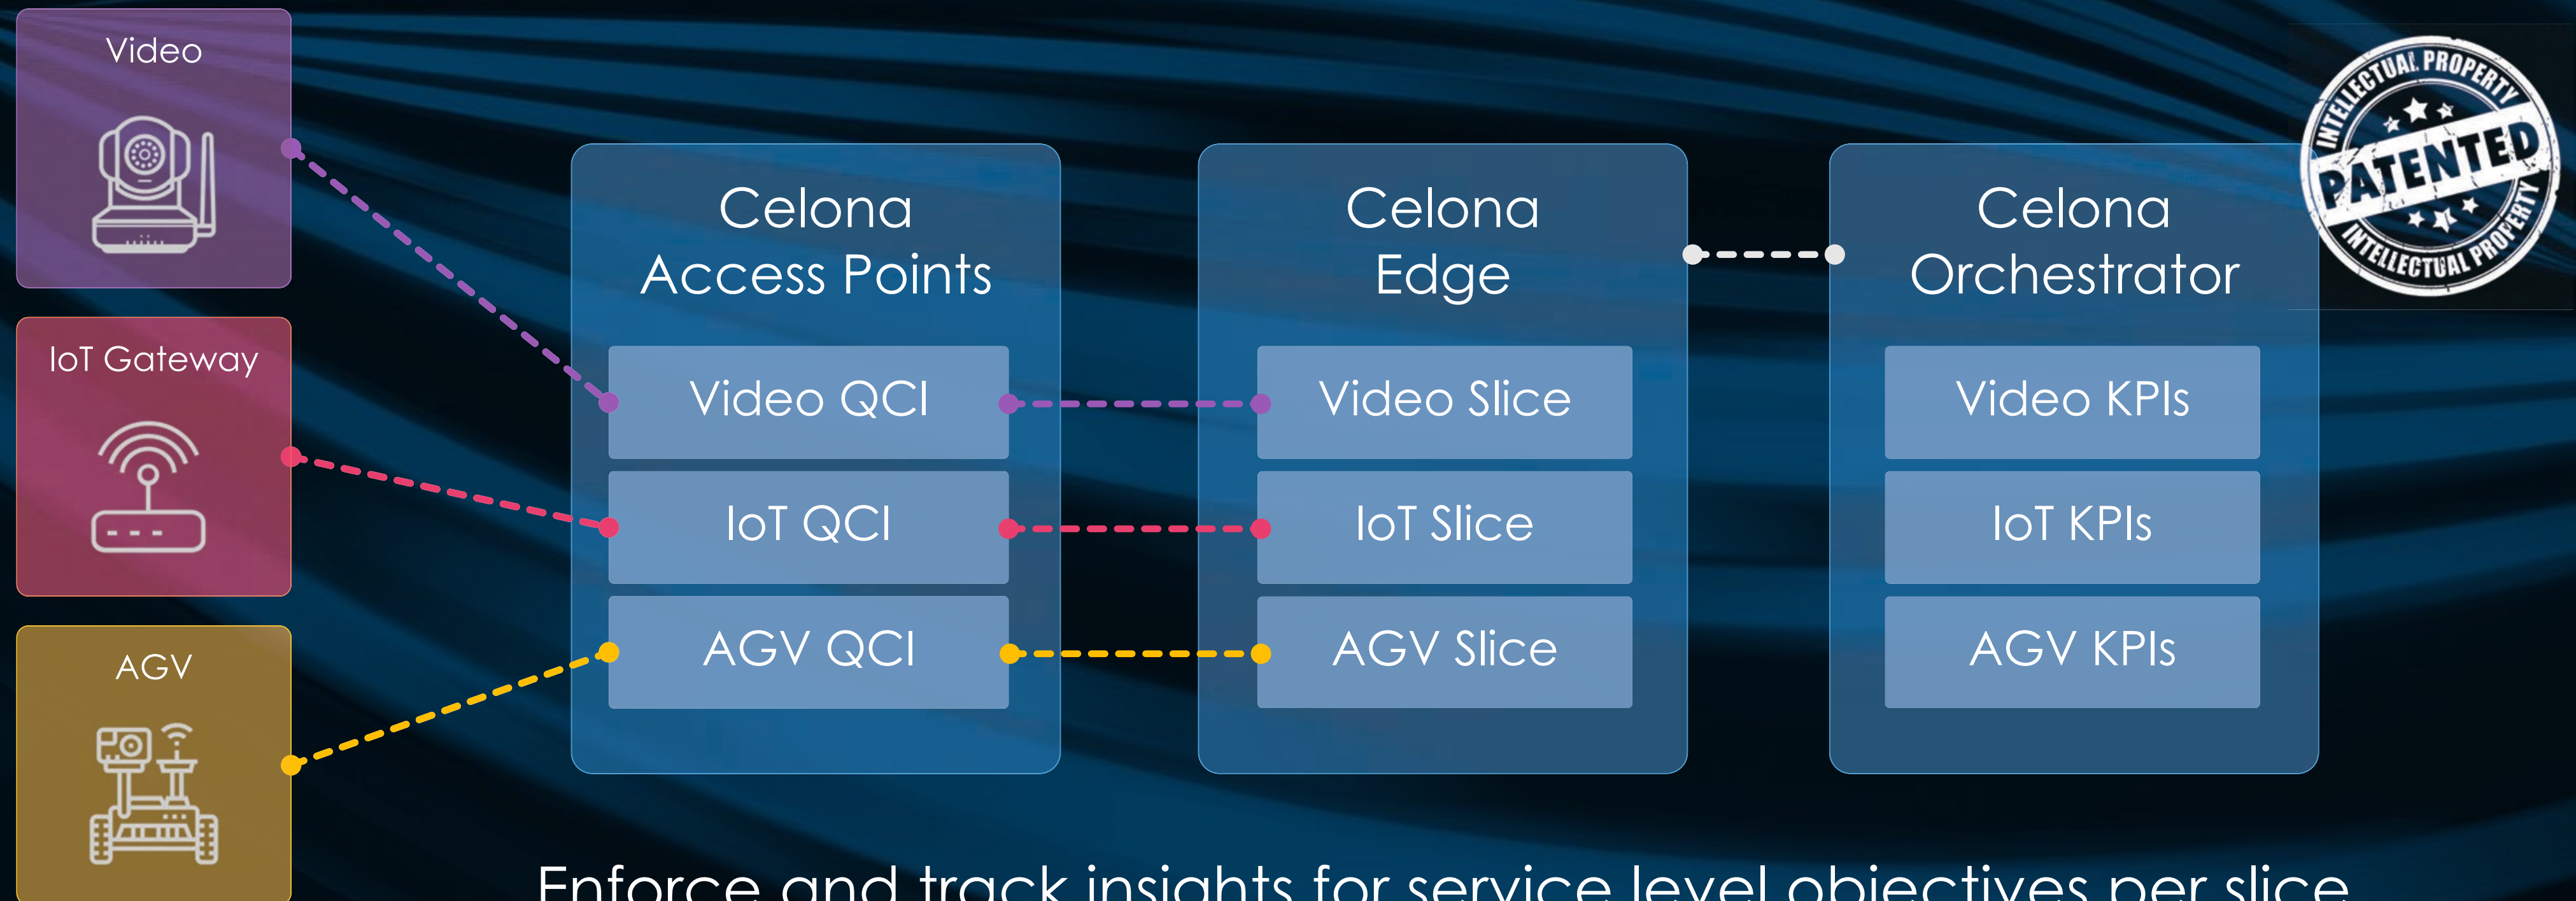

First cloud-native
network OS creating
the edgeless enterprise

Service Level
Application Assurance
with MicroSlicing™

APP-CENTRIC OPERATIONS WITH MICROSPLICING™

Enforce and track insights for service level objectives per slice
(eg. latency, jitter, error rate, throughput)

MYRIAD VERTICAL USE CASES

Healthcare

Smart devices and patient room technology

Warehousing

Rugged tablets & automated mobile robots

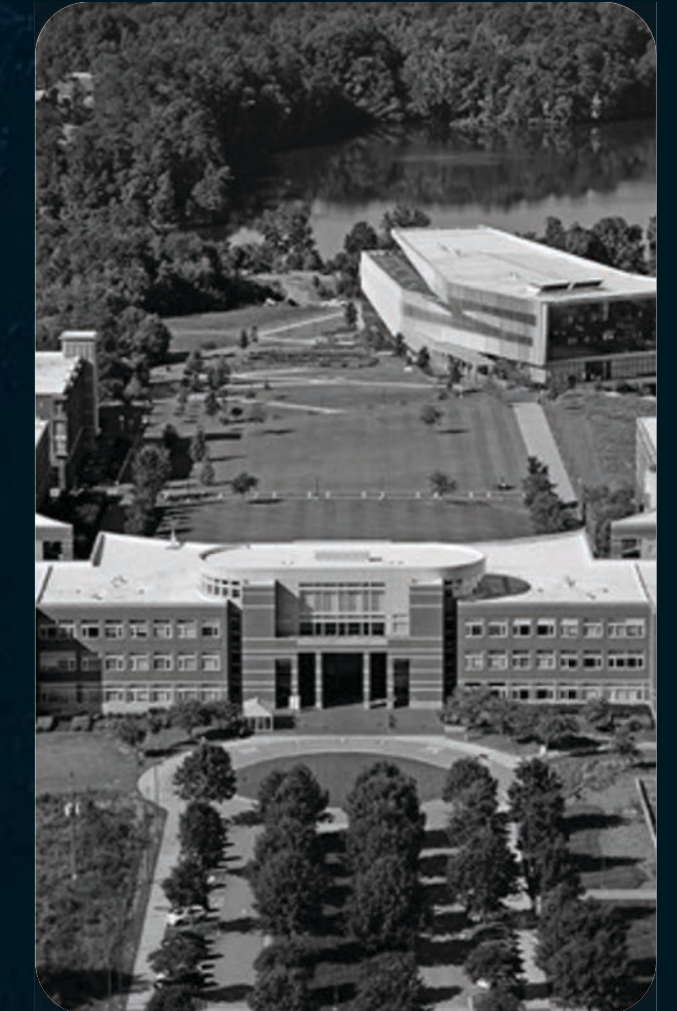

Construction

In-vehicle connectivity and video cameras

Airports

Push to talk, staff devices & barcode scanners

Higher Education

Outdoor wireless for facilities tech and video cameras
