

celona
5G LAN for Manufacturing
Significantly better network for a lower TCO

Connectivity: The Forgotten Infrastructure

Manufacturing companies cannot survive in today’s unpredictable world without making the transition to digital-first operations. Still, manufacturers have long trailed behind other sectors in their business transformation efforts. Poor connectivity in manufacturing floors, warehouses and shipping yards means a large gap remains between the promise of transformation and the reality on the ground.

Poor Connectivity Affects Digital Transformation Efforts

Agile Manufacturing	Transforming Worker Productivity	AGV/AMR Operations
<ul style="list-style-type: none"> Wired manufacturing lacks agility High latency challenge for PLC Poor IoT data affects AI models 	<ul style="list-style-type: none"> Poor worker device performance Inaccurate scanning Ineffective fork-lift dispatch Unreliable worker communications 	<ul style="list-style-type: none"> Poor operation in dense metal areas Mobility issues for AGVs at speed Scalability of AGV fleets Increase in collisions/stoppage

Real-world performance of Celona Private 5G vs Wi-Fi

Superior Coverage

- 1/5th - 1/10th the APs as Wi-Fi
- Indoor and outdoor

Wi-Fi Heat Map

5G LAN Map

Seamless Handovers

Flawless roaming across APs

- 400 AGVs
- 61K Handovers/day
- 25mph speed

Ultra-low Latency

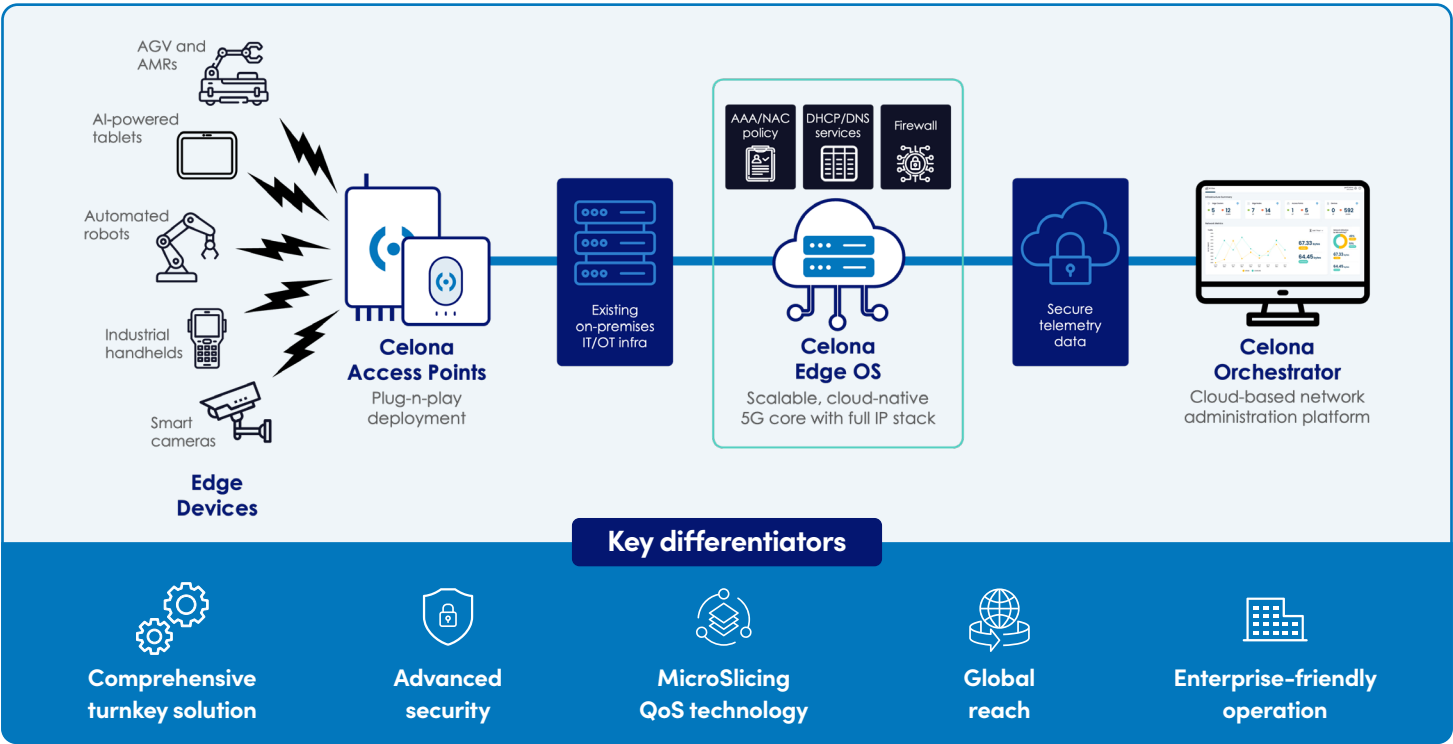

MicroSlicing™ enabled QoS

- Guaranteed latency < 30msec
- Latency sensitive PLC, sensors etc.

Average Ping Response Time (msec)

Celona 5G LAN: Turn-key Enterprise Friendly Solution for Manufacturing

Significantly Better Network with Lower TCO than Wi-Fi

Outdoor Manufacturing Yard | 2.8M sq-ft
Equivalent Wi-Fi APs required: 47
Celona 5G LAN APs required: 3

Indoor Manufacturing Plant | 320,000 sq-ft
Equivalent Wi-Fi APs required: 59
Celona 5G LAN APs required: 8

"If I had to continue to deal with the Wi-Fi issues I have to deal with every day at the plant, I'd have to hire more people. And frankly, that wouldn't even fix the technical challenges that I have with using Wi-Fi technology within our environment. With Celona's technology, all that goes away. The solution pays for itself."

Head of IT operations for the U.S Steel Manufacturer
