

celona
5G LAN for Warehousing and Logistics
Significantly better network for a lower TCO

Connectivity: The Forgotten Infrastructure

Warehouses and logistics companies cannot survive in today’s unpredictable world without making the transition to digital-first operations. Still, warehouses have long trailed behind other sectors in their business transformation efforts. Poor connectivity in warehouses, distribution centers and logistics yards means a large gap remains between the promise of transformation and the reality on the ground.

Poor Connectivity Affects Digital Transformation Efforts

Worker Productivity	AGV/AMR Operations	Yard Management
<ul style="list-style-type: none"> Poor device performance Inaccurate scanning Ineffective fork-lift dispatch Unreliable worker communications 	<ul style="list-style-type: none"> Poor operation in dense metal areas Mobility issues for AGVs at speed Scalability of AGV fleets Increase in collisions/stoppage 	<ul style="list-style-type: none"> Unreliable yard truck dispatch Scanners disconnecting in yards Affects reliability of perimeter camera/computer vision

Real-world performance of Celona Private 5G vs Wi-Fi

Superior Coverage

- 1/5th - 1/10th the APs as Wi-Fi
- Indoor and outdoor

Wi-Fi Heat Map

5G LAN Map

Seamless Handovers

Flawless roaming across APs

- 400 AGVs
- 61K Handovers/day
- 25mph speed

Ultra-low Latency

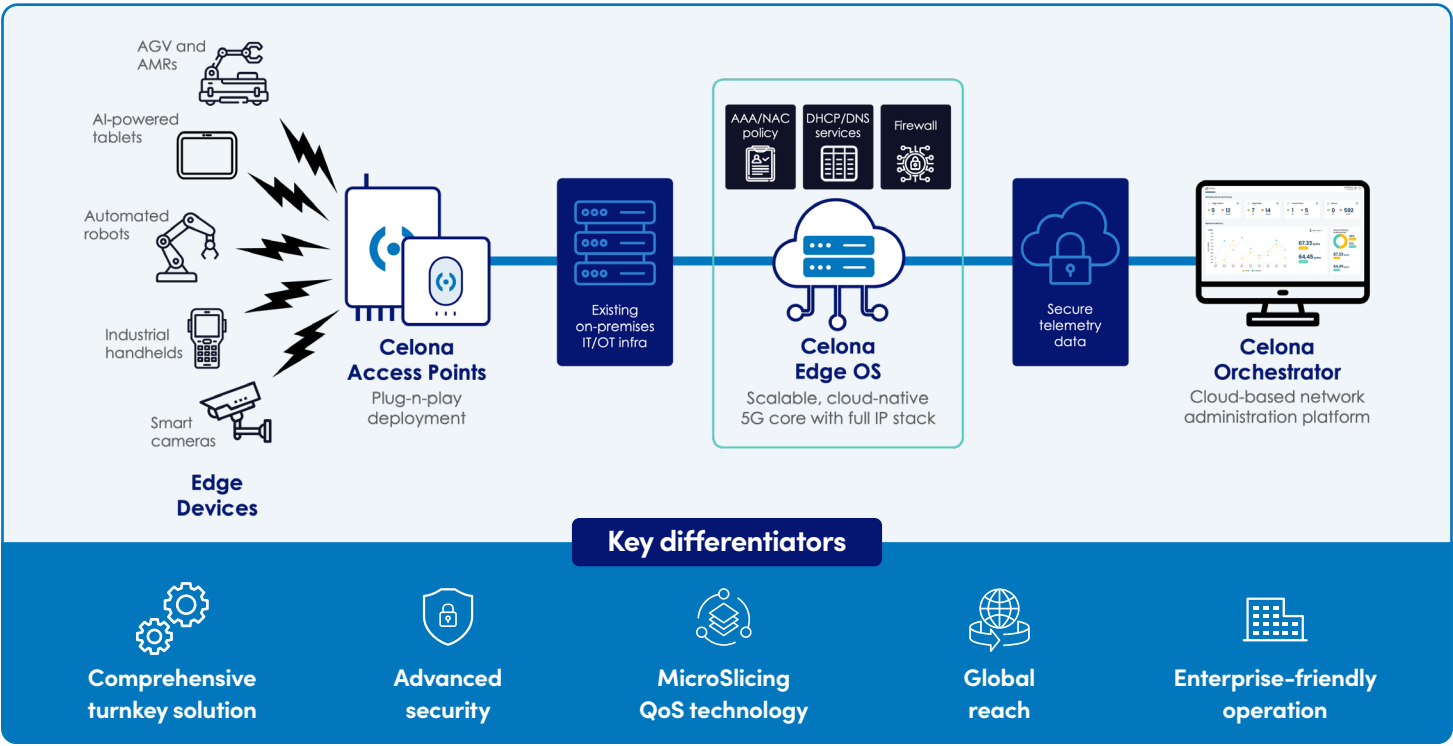

MicroSlicing™ enabled QoS

- Guaranteed latency < 30msec
- For latency sensitive AGVs, cameras, etc.

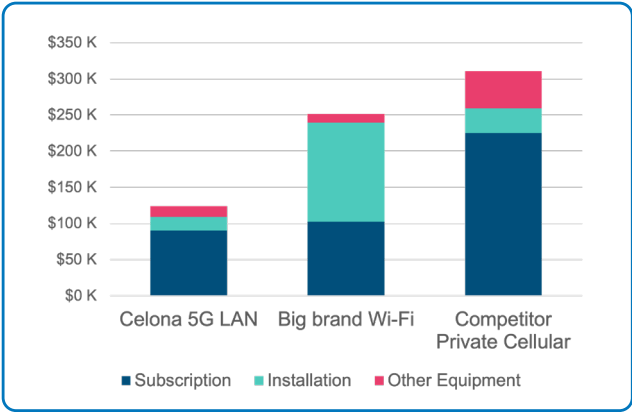

Average Ping Response Time (msec)

Celona 5G LAN: Turn-key Enterprise Friendly Solution for Warehouses

Significantly Better Network with Lower TCO than Wi-Fi

Outdoor Yard | 561K sq-ft
Wi-Fi APs: 23 | Celona 5G LAN APs: 3

Indoor Warehouse | 775K sq-ft
Wi-Fi APs: 134 | Celona 5G LAN APs: 15

"Our testing and analysis clearly revealed the value of private wireless in delivering lower latency jitter, improved wireless coverage and seamless mobility at a lower total cost of ownership over traditional warehouse Wi-Fi implementations."

Ken Wright | P.E. Director of Technology | M.S. Benbrow and Associates
