

End-of-Life (EoL) Announcement: AP21-48

- Date: July 15, 2025
- Product: Celona Outdoor 5G Access Point – AP21-48
- Recommended Replacement: AP25-48

Celona announces the official End-of-Life (EoL) for the AP21-48 outdoor 5G access point. Customers are encouraged to transition to the new Celona ruggedized outdoor AP, AP25-48. The AP21-48 will remain fully certified and supported through its designated support period.

Key Milestones

Milestone	Date
EoL Announcement	August 1, 2025
End-of-Sale (Last Order)	September 30, 2025
End of Support (EoS)	September 30, 2030

Transition Details

- Replacement Model: AP25-48
- Form Factor & Compatibility: Mechanically and electrically identical to AP21-48

- No Change to Antennas, RF Performance, or Coverage
- New Features: Carrier-grade GPS, -40°C operating temp, improved MTBF (390K hours)

Support & Warranty

- All AP21-48 subscriptions remain valid through the EoST date.
- Celona will fulfill RMA requests with AP21-48 units while supplies last. AP25-48 will be used once inventory is depleted.
- No requalification or retesting required when transitioning to AP25-48.

Next Steps

Customers are encouraged to transition to the AP25-48 for all new deployments. The AP25-48 supports both greenfield and brownfield scenarios with no changes to mounts, cabling, or provisioning workflows. Mixed deployments are fully supported.
